Introduction

A2X

A2X is a market infrastructure licensed as an exchange in terms of the Financial Markets Act, No 19 of 2012 (“the Act”).

Controlling Body

It may also, with the approval of the registrar, delegate functions to an external party.

A2X Rules and Directives

In terms of section 17 of the Act, A2X must issue exchange rules to ensure the regulation of the business it conducts as an exchange in a fair and transparent manner with due regard to the rights of members and their clients. These rules are set out in this document.

The Act also authorises A2X to issue A2X directives which are necessary to supplement these rules to ensure fair, efficient and transparent markets. The A2X directives are binding on members and their staff but not clients.

These rules are binding on the entities identified in section 17 (7) of the Act and every transaction in equity securities concluded on A2X is subject to these rules, the A2X directives and the Act. The interpretation and enforcement of the rules and A2X directives vests with the controlling body.

Any proposed amendments to the rules and A2X directives should be submitted to the controlling body for consideration. Rule and A2X directive amendments approved by the controlling body will be distributed for comment by members via a trading notice.

Any comments or objections by members on the proposed amendments must be submitted in writing to the controlling body within 14 days. The comments and objections will be considered by the controlling body and a written response thereto will be provided within 21 days.

Amendments to the rules must thereafter be approved in accordance with the provisions of the Act. Rules will be deemed to have been approved upon the date specified by the registrar and directives will be deemed to have been approved when members are advised of the amendments as approved by the controlling body and the date of implementation.

- 7.25 Should A2X elect to proceed in terms of rule 7.24:
- 7.25.1 in accordance with the principles of clearing and settlement of equity securities set out in rules 7.1 to 7.3, a transaction or transactions which in the opinion of the settlement committee best correlate with the rolled transaction, will be identified

Any capital exposure requirement which a client has funded will be held by the A2X as collateral posted by the client and will only be used by the A2X to meet the obligations of such client arising from unsettled transactions on that client's account.
